

Features & Benefits: Powder paintings

Powder paintings are products without any solvent, respecting the environment. Powdering is the cleanest and most economic technology currently existing. The mechanical performances of the powder paint are excellent, especially concerning the shock resistance. The powder paint protect and decorate any metal surface. They allow to create visual and tactile effects by playing with colour, opacity, brilliance and structure. These effects result in warm, cold or soft touch.

*You have the choice between **4 different powder paint ranges**: Neutral, Metallic, Structured, Coloured*

Neutral paints

5 hues between white and black obtained by an homogeneous pigmentation.

Illustration	Name Code
	Grey 0 G0 - 230
	Grey 3 G3 - G30
	Anthracite LA
	Diamond Dark 260

Metallic paints

Aluminium particles are used to obtain the metallic effect. The quantity of aluminium particles can reach up to 15-20 %.

Illustration	Name Code
	Metallic Aluminum 320
	Graphite 210
	Silver SL
	Nickel NI

The so called "bonded paints" are a special type of metallic paints. The percentage of aluminium particles is higher than in other paints (more than 20%), resulting in profound colours effects.

Structured paints

Textured paints integrating micro-balls.

Warm and soft touch. Structured paints are particular resistant to abrasion.

Illustration	Name Code
	Pearl Ice Blue ZG
	Pearl Slate ZX
	Pearl Champagne ZF
	Pearl Snow ZW
	Pearl Alu ZS
	Pearl Black PB

Coloured paints

These 4 coloured paints can be used to give coloured accents on details or pedestals.

All RAL colours can be ordered as specials on demand for the same objective.
