

### Features & Benefits

Wood is renewable, recyclable and has got a natural touch and smell.  
 It is a warm rich material, creating a pleasant atmosphere in the office.  
 Veneer furniture represents authenticity and elegance and is a unique product.

**Please take into account the following points when ordering veneer products:**

- Veins and shades may slightly vary from one order to another since it is a natural product and each tree is different.
- When exposed to natural light, the finish can get a patina and colour may change.
- Veneer finish is less shock resistant than laminate, even with the specific varnish "New Touch".

To obtain good matching (colour, texture, grain) without additional cost of the various units making up an office grouping, they should be listed together and clearly distinguished at the time of ordering.  
 This will ensure that the veneers used in making up the order is all from the same billet of wood for best matching.

For more than 5 furniture units per office grouping, the factory must be consulted.

To obtain perfect matching between several furniture units (for example, in the case of several cupboards making up a range of cupboards or desks place facing one another) it possible to make a special request for the use of fully matched (paired) veneers.

### Price level A

Illustration	Name Code	Description
	Canadian Maple (ER)	Very light veneer in crown cut pattern. Classic and elegant finish. Patina can get very strong with natural light. The colour is getting a golden aspect. The presence of brown traces of sugar is particular to this veneer type.
	Natural Beech (HW)	European wood, natural shade with fine characteristic beech grains. The patina is not very pronounced. Crown cut pattern for a classic office environment.
	Shady Beech (HP)	Same veneer as natural beech coloured in a shady brown.
	Wenge Style (WE)	Since the Wenge tree is menaced from extinction we use ultra veneer in Wenge style. The popular trend "back to the 60ies" is very well represented with this linear veins finish in a dark brown shade.

## Price level B

Illustration	Name Code	Description
	Natural Oak (CC)	<p>European origin. Natural colour with variation from beige to honey. Straight cut pattern with linear veins and a large grain are giving a modern look to a classic finish.</p> <p>Natural oak is recommended for modern environments on rectangular or oval table shapes.</p>
	Shady cherry (MX)	<p>Canadian Origin.</p> <p>Cherry is the wood which is getting the strongest patina of all. Therefore it has been tinted brown to avoid too strong colour differences. Crown cut pattern together with a fine grain is creating an authentic look for a warm and classic office environment.</p> <p>Brown traces of sugar are particular for this veneer type.</p>
	Natural cherry (OZ)	<p>Natural cherry (code OZ) is the same veneer as cherry (code MX), but without stain.</p> <p>When ordering natural cherry, much attention must be paid to the effects of light (Patina). Periodically move around the objects and accessories on your desk and furniture to avoid shadows on your wooden surface.</p>
	American Walnut (NU)	<p>North American Origin.</p> <p>Brown-grey shades with strong appearing veins and characteristic knots.</p> <p>Pronounced golden patina.</p> <p>Walnut is very trendy on rectangular or oval shapes.</p> <p><b>NU American Walnut (straight cut)</b> is used on Steelcase Veneer products and in the following Attesse ranges: Trigos, Litera and Prologue.</p>
	American Walnut (NS)	<p>North American Origin.</p> <p>Brown-grey shades with strong appearing veins and characteristic knots.</p> <p>Pronounced golden patina.</p> <p>Walnut is very trendy on rectangular or oval shapes.</p> <p><b>NS American Walnut (crown cut)</b> is used on P30.</p>
	Black Oak (CG)	<p>European origin, tinted in dark black.</p> <p>Large crown cut pattern for classic Management furniture.</p>
