

EFFEKT ECOSUND® PENDENT

An effective way to improve the acoustics of a room without having to change existing installations such as ventilation, cables, lights, etc. is to mount Effekt Pendent ceiling absorbers. With even distribution based on the needs of the local area, it becomes an affordable solution that reduces a lot of audio spread in the longitudinal direction of the room. Customize your absorbers by choosing from four core materials and laminate them with the Hush textile, available in several different colors.

EFFEKT ECOSUND PENDENT ROOM DIVIDER

Effekt is made in three standard sizes and has a thickness of 50 mm for good sound absorption. Effekt is hung in wire strings that connect and form a wall. An affordable solution that reduces a lot of sound propagation in the length of the room and parts of the room in smaller rooms. Design your unique room divider by choosing from four different core colours, six different hang wires, and a variety of colors from the Hush textile. As the design of the product may challenge for climbing and the product is not suitable for that, Effekt is not recommended for school and care.

PRESCRIBED TEXT

Effekt Ceiling/Room Divider

Vertical hanging sound absorbant for ceilings, made from EcoSUND.

Mounting: can be interconnected with hangwires. Total thickness: 50 mm. Measurements: (choose below).
